Contents Vol. 126

U–Pb and Sm–Nd evidence for 1.76–1.77 Ga magmatism in the Moriru region, Mato Grosso, Brazil: implications for province boundaries in the SW Amazon Craton
M.A.S.B. Pinho, F. Chemale Jr, W. Randall Van Schmus and F.E.C. Pinho 1

Late Neoproterozoic/Early Palaeozoic events in central Dronning Maud Land and significance for the southern extension of the East African Orogen into East Antarctica
J. Jacobs, W. Bauer and C.M. Fanning 27

Nature of Assean lake ancient crust, Manitoba: a combined SHRIMP–ID-TIMS U–Pb geochronology and Sm–Nd isotope study
C.O. Böhm, L.M. Heaman, R.A. Stern, M. Timothy Corkery and R.A. Creaser 55

Provenance characteristics of Mesoproterozoic metasedimentary rocks from Telemark, South Norway: a Nd-isotope mass-balance model
T. Andersen and K. Laajoki 95

Significance of U–Pb detrital zircon ages in quartzite from peri-Gondwanan terranes, New Brunswick and Nova Scotia, Canada
S.M. Barr, D.W. Davis, S. Kamo and C.E. White 123

Mesoproterozoic U–Pb and Pb–Pb ages of granulites in NW Namibia: reconstructing a complete orogenic cycle
B. Seth, R.A. Armstrong, S. Brandt, I.M. Villa and J.D. Kramers 147

Erratum

Erratum to "Spatial and temporal variations in the geochemistry of komatiites and komatiitic basalts in the Abitibi greenstone belt". [Precambrian Research 115 (2002) 153–186]
R.A. Sproule, C.M. Lesher, J.A. Ayer, P.C. Thurston and C.T. Herzberg 169

Special Issue
Early Archaean processes and the Isua Greenstone Belt, West Greenland

Guest Editors

Peter W.U. Appel
Geological Survey of Denmark and Greenland Øster Voldgade 10, DK 1350 Copenhagen, Denmark

Stephen Moorbath
Department of Earth Sciences, Oxford University, Parks Road, Oxford OX1 3PR, UK

Jacques L.R. Touret
Musée de Minéralogie, Ecole des Mines, 60 Boulevard Saint-Michel, 75006 Paris, France

Sponsors: The Danish Natural Science Research Council, The Commission for Scientific Research in Greenland, The Bureau of Minerals and Petroleum, Nuuk, The National Geographic,

The Max-Planck Institut für Chemie, Mainz, The Natural History Museum, Toronto, and The European Science Foundation

Early Archaean processes and the Isua Greenstone Belt, West Greenland
P.W.U. Appel, S. Moorbath and J.L.R. Touret 173
Metamorphic history suggested by garnet-growth chronologies in the Isua Greenstone Belt, West Greenland
H. Rollinson 181
Alteration and geochemical patterns in the 3.7–3.8 Ga Isua greenstone belt, West Greenland
A. Polat and A.W. Hofmann 197
Remnants of early Archaean hydrothermal methane and brines in pillow-breccia from the Isua Greenstone Belt, West Greenland
J.L.R. Touret 219
U–Pb geochronology of 3810–3630 Ma granitoid rocks south of the Isua greenstone belt, southern West Greenland
J.L. Crowley 235
Deformation features and critical field relationships of early Archaean rocks, Akilia, southwest Greenland
M.J. Whitehouse and C.M. Fedo 259
Oxygen isotopes of an Early Archaean layered ultramafic body, southern West Greenland: implications for magma source and post-intrusion history
D. Lowry, P.W.U. Appel and H.R. Rollinson 273
A refined solution to Earth's hidden niobium: implications for evolution of continental crust and mode of core formation
B.S. Kamber, A. Greig, R. Schoenberg and K.D. Collerson 289
Isuasphaera isua (Pflug) revisited
P.W.U. Appel, S. Moorbath and J.S. Myers 309
Exogenous carbonaceous microstructures in Early Archaean cherts and BIFs from the Isua Greenstone Belt: implications for the search for life in ancient rocks
F. Westall and R.L. Folk 313
Graphite and carbonates in the 3.8 Ga old Isua Supracrustal Belt, southern West Greenland
M.A. van Zuilen, A. Lepland, J. Teranes, J. Finarelli, M. Wahlen and G. Arrhenius 331
Sulphur isotopes and the early Archaean sulphur cycle
H. Strauss 349
A rare earth element study of complex zircons from early Archaean Amîtsoq gneisses, Godthåbsfjord, south-west Greenland
M.J. Whitehouse and B.S. Kamber 363
Volatile element abundance patterns and an early liquid water ocean on Earth
J.D. Kramers 379
